1. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach and/or suggest providing an allothermic steam gasification apparatus comprising a pressure supercharged fluidized bed gasification chamber with a pressure tight lock for supplying the feed materials that are to be gasified, a filter chamber connected to the fluidized bed gasification chamber via a connecting channel, an external heat source and heat pipe arrangement that takes up heat from the external heat source and gives of the heat to a gasification bed in the fluidized bed gasification chamber. The prior art does teach providing supercharged or pressurized fluidized bed gasifiers such as taught by Forney et al. which was used in the rejection but as pointed out in applicant's arguments there is no need for Forney to use an external heat source for gasification, in Forney the heat is coming from the combustion of the materials taking place in the gasifier, there is no need to use an external heat source or the heat pipe arrangement as claimed. For the same reasons, the prior art's gasifiers do not require the external heat source and heat pipe arrangement in combination with the pressure super charged fluidized bed gasification system as claimed. Applicant's gasification apparatus produces gases with a caloric value of 8,000 to 10,000 KJ/m<sup>3</sup> using an efficient apparatus, which has not been taught or suggested either singularly or in combination by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
